

Assistant Project Scientist at the Institute for Software Research at UC-Irvine and software Engineering and Analysis Lab (SEAL) at UCI's Department of Informatics. Current research interests include mobile security, testing, and analysis - and addressing problems of software architectural drift and erosion. Before joining UCI, he was Postdoctoral Research Fellow at George Mason University's Department of Computer Science. He received three degrees from the University of Southern California: a B.S. in Computer Engineering and Computer Science, an M.S. in Computer Science, and a Ph.D. in Computer Science. His industrial experience includes software engineering or research positions at the NASA-JPL, the Southern California Earthquake Center, and Xerox Special Information Systems.
